

WINDERMERE CONSTRUCTION GUIDELINES 2017

Construction is permitted M - F 7:30 am - 5:00 pm, and Saturday from 8:00 am- 4:00 pm.
Construction is not permitted on Sunday or major Holidays

When doing construction work in Windermere please follow these guidelines:

- **Coordinate all construction and worker parking on one side of the street (the side adjacent to your home) to facilitate worker safety and traffic safety passing by the construction site.** We do not want workers crossing the street to/from your property to access their trucks, tools, supplies. This is safer for them, pedestrians and drivers in our neighborhood.
- Do not keep trailers unattached to vehicles on the street longer than 72 hours.
- A dumpster with a lid should be used.
- Debris must be cleaned up on a daily basis.
- Keep mud and dirt from entering the street
- Maintain dust control
- Be cautious and courteous of noise control, no loud music, no offensive language, etc.
- Advise the neighbors of your starting date and keep them up-to-date of any part of the construction that will have a major impact on them.

A copy of these guidelines should be given to all constructions workers working on your project.

Remember this is your neighborhood, and your construction project impacts your neighbors who will appreciate you following these guidelines. You will be advised of complaints from neighbors. Please give me a call if you have any questions or problems.

Thank you.
